Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 October 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 9-12, 14, 15-21, 23-25 and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Husak U.S. Patent Number 6,157,647.

Re Claims 9, 16, 17, 25, fig. 1 teaches a router 60 for receiving (a ingress port) a data packet having a destination address whereby the router determines if the received from a router 54 in VLAN (VPN or a provider network) wherein the router 60 perform performs in response the received packet, a NHRP query to determine the VLAN tag (a type field); once determined, the forwarding router 60 adds (circuitry to add) the VLAN tag (a forwarding tag) based on the destination address of the destination router (to another provider router), whereby the intermediate routers between the source and destination router performs, in response to the VLAN tag, determines whether the VLAN tag should be forwarded (forwarded to another provider router) and if the VLAN tag is associated with the destination VLAN (egress port), the destination router removes (circuitry to remove) the forward tag and forward the packet to the destination device in the associated VLAN network (See col. 3, lines 30 +).

Art Unit: 2663

Re Claims 10-12, 18-21, NHRP query (external gateway protocol) is the reachability message whereby to determine the VLAN tag to be added to the forwarding packet.

Re Claims 14, 15, 23, 24, refer to Claim 9, wherein the intermediate routers are transit routers, and source/destination routers are edge routers.

Re Claim 27, refer to Claim 9, wherein the packets (carrying instructions for execution) transmitted over the computer network is an electromagnetic signal.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13, 22, 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Husak U.S. Patent Number 6,157,647.

Re Claims 13, 22, Husak fails to explicitly teach the BGP. However, one skilled in the art would have been motivated to any known gateway protocol to determine reachability. Therefore, it would have been obvious to one ordinary skilled to use a known protocol BGP that is availability to one skilled.

Re Claim 26, Husak fails to explicitly teach a computer readable media containing instructions. However, one skilled in the art would have been motivated to stored the instructions into a readable media for portability.

Allowable Subject Matter

5. Claims 1-8 are allowed.
